3:30pm (Vietnamese time)  
9:30am (GMT time)

### Date

June 30, 2015

### Registration

[www.evbn.org](http://www.evbn.org)

### Did you know that Vietnamese energy demand is increasing faster than its GDP?

As Vietnam is maintaining its current rate of rapid growth, the country is now facing the rising demand for power and energy in the upcoming years. The search of reliable sources for energy efficiency, renewable energy, water management and waste management has become a priority for the country.

Join our webinar "Green Technology – Opportunities in Vietnam" to discover Vietnam's great potential for foreign investors in clean development

The webinar will also provide useful information on our subsidized one-week mission to Vietnam in November 2015 **only for European companies.**

(\* This webinar is free of charge
